Press Release

June 29, 2005 Eastpointe, MI

Montana’s State Energy Advisor Mark Lindberg is welcomed to the team as regional representative for Alternate Energy Solutions to facilitate wind project development in the western U.S.

Alternate Energy Solutions is pleased to announce the appointment of Mr. Mark Lindberg as the company’s representative in Montana and western states.

Mr. Lindberg was selected in a nationwide search to be Montana Governor Judith Martz’s Energy and Agriculture Business Development Officer, holding the position for four years, ending in Dec. 2005. In this position he co-authored the state’s strategic economic plan, testified many times before the Montana Legislature on a wide array of energy issues ranging from alternative energy development to transmission infrastructure, launched Montana’s Carbon Sequestration Program, and assisted Roundup Power with issues pertaining to environmental and construction permitting for a \$1 billion 750MW plant which will begin construction on schedule in 2005 and employ an estimated 300 people.

Lindberg served as Montana representative to the Rocky Mountain Area Transmission Study (RMATS), coordinated project to supply Montana schools with wind generated power with an initial investment of \$5 million during 2005. Mr. Lindberg also managed the regulatory process and procedures to incrementally build a 300MW wind farm in northern Montana that is on track to launch phase one construction during 2005. Mark has been a board member of the Sun River Electric Cooperative since 1991 to present, and has served as the cooperative’s board president from 1998 to 2002.

Commenting on the appointment, company president John Wolar said, “Mark Lindberg was instrumental helping our company establish contacts and build relationships in the State of Montana. We have known Mark for a number of years and consider ourselves fortunate to have him on the team.”

Alternate Energy Solutions is a Michigan company specializing in development of renewable energy utilizing wind turbines, solar thermal collection and geothermal systems. Company services to clients include wind testing and mapping, electrical system design and component specification, system operation, training and maintenance.
