Press Release

October 1, 2007 Eastpointe

Alternate Energy Solutions prepares for training on a utility-scale wind turbine installation in the Midwest.

The company will begin project construction shadowing with an international turbine manufacturer during the month of October. Alternate Energy Solutions' staff will monitor and assist with wind turbine foundation installation. The assembly and commissioning of wind turbine generation will continue through the month of December as part of a private letter Memorandum of Understanding between the company and the manufacturer.

The particular wind turbine development is not a company project; but rather, a training task for Alternate Energy Solutions, as we progress with the manufacturer toward achieving factory certification.

Alternate Energy Solutions is a Michigan company specializing in development of renewable energy utilizing wind turbines, solar thermal collection and geothermal systems. Company services to clients include fatal-flaw analysis, wind testing and mapping, electrical system design and component specification, system operation, training and maintenance.
